

Horizontal Bicycle Storage Locker

Model Number, JHBSL

Product Summary

This New Zealand made Jaloc Bicycle locker is architecturally suited for medium-high density housing patio, carport or carpark area.

The custom designed Jaloc Upright Storage Locker is designed to securely store Up to 4 Adult sized bicycles and more. It features twin hinged doors, sturdy lock, Corner Shelf and free space for tool kits and accessories.

The cabinet is made from folded electro galvanised panels riveted together using stainless steel rivets. Stainless steel panels are an option for greater durability in exposed coastal environments. Reinforcing channels ensure rigidity.

The locker is designed for outdoor use by overlapping panel construction to prevent water ingress with pitched roof, door head peak and condensation drainage holes.

The doors hinges are secure with Hardened Steel Pin Hinges and obscured fixings.

The Bicycle Locker uses a single robust nylon pull handle and a compression latch key operated barrel lock system. Twin Door Lock Rods engage in the Chassis for security. Internal contents are hidden from view when closed.

The locker height and level can be adjusted using screw in M10 adjustable feet to approximately 50mm. Typical installation is to bolt to concrete pad with M10 Dynabolts and nylon shims.
