

Jaloc Vertical Bicycle Storage Locker

Model Number, JBSL-V

Product Summary

This New Zealand made Jaloc Bicycle locker is architecturally suited for medium-high density housing patio, carport or carpark area.

The custom designed Jaloc Upright Storage Locker is designed to securely store adult sized bicycles and more. It features a hinged door, sturdy lock and free space for tool kits and accessories. Bikes are supported with a wheel run and tie post inside the cabinet. An adjustable stop holds the wheel in position. A flip down ramp aids loading and unloading.

The cabinet is made from folded electro galvanised panels riveted together using mono steel rivets. Stainless steel panels are an option for greater durability in exposed environments.

The locker can be manufactured for outdoor use by overlapping panel construction to prevent water ingress, and condensation drainage holes.

The Bicycle Locker uses a robust nylon quarter-turn handle and a compression latch key operated barrel lock system. Internal contents are completely hidden from view when closed.

The locker height and level can be adjusted using screw in M10 adjustable feet to approximately 50mm. Typical installation is to bolt to concrete pad with M10 x 50 Dynabolts.
