

Jaloc Powerhouse

Mechanical Plant Enclosures

The Jaloc Powerhouse plant enclosure is a robust weatherproof, rust resistant indoor/ outdoor steel fabricated locker. Powerhouse is designed specifically to protect expensive air compressors, refrigeration compressor units, gas supply equipment, water pumps and electrical switching plant & Batteries.

Built to withstand weather conditions and general day to day commercial use.

An attractive enclosure that is built to order. We offer both ventilation and solid panels. Purpose designed louver panels provides security while helping to prevent mechanical plant from overheating.

The unique louvered panels can be fitted with insect and vermin proof screens to the interior. Roof panel is pitched for rain run off, along with drip channels. Hinged or lift off panels including roof can be provided. Floor Panel in solid or mesh is optional

Construction is all galvanised steel with hinged lockable doors, commercial door hardware, heavy gauge galvanised steel lifting lugs, internal plant mountings and secure base fixing points.

Dulux Duralloy Powder coated colour options are available in corporate and architectural colours. This will improve appearance and longevity.

The Jaloc Powerhouse enclosure is made to order to meet your specific site requirements. Panel types, dimensions and materials can be altered to suit.
