

The Dual Level Storage Locker

Model Number, JDLL 5300

Product Summary

The New Zealand made Jaloc Dual Level – a folded sheet metal storage locker is architecturally suited for an apartment garage or basement car park area.

The custom designed Dual Level Storage Locker includes two levels of space designed storage.

The upper level, 2.8 m³ is separated from the lower level with a folded reinforced sheet metal base which can be removed to give a total cabinet space of 5.6 M³ if required.

Access to the upper level is through a lifting door supported by two gas filled lifting struts fitted to each end of the door. This makes the opening process of lifting the door very easy.

The lower level, 2.8m³ is accessible through two hinged doors (left and right hinging) opening outwards.

The Dual Level Locker is made from folded electro galvanised panels and braces designed to give the locker maximum strength.

The cabinet panels are held together using mono steel rivets.

The locker can be manufactured by request for outside use. Flashings and seals prevent water ingress, and construction is from galvanised sheet steel, galvanised hinges and stainless steel rivets.

The door hardware includes robust flush mounted pull handles and compression latch key operated barrel locking system. Zinc plated butt hinges, and gas struts assist lifting the top hinged door.

**THE SMART, SPACE-SAVING WAY TO KEEP BULKY ITEMS CLEAN, SECURE AND CLOSE-AT-HAND
MADE HERE IN NEW ZEALAND**

Screw in height adjustable mounting feet are strategically placed to support the total loaded weight of the locker.

A perforated top panel is available when the locker is situated under a buildings sprinkler system.

Design and materials.

Panels are made from .080 and .090 Electrogalv Sheets JIS G3313 0.06 OZ SECC PHOS & Dry.

Lockers are designed and manufactured in New Zealand to NZ standards using CNC technology and the latest in sheet metal machinery.

Surface finish is powder coating for appearance and durability. Dulux Duralloy colours by approved applicator are standard.

The unique Jaloc designed cabinets have been developed over the years to meet our customer's very demanding specifications for an attractive, strong and reliable container.
