

The Dual Upright Storage Locker

Model Number, JDUL 4000

Product Summary

The New Zealand made Jaloc Dual Upright – folded sheet metal locker is architecturally suited for an apartment garage or basement car park area.

The custom designed Dual Upright sheet metal storage locker is a secure lockable cabinet with two sliding doors designed to give maximum space storage capacity.

Removable metal shelves are supplied. They fit to 6 different positions of welded shelf supports. A total of 3.3m³ of storage space is achieved.

The locker is made from folded electro galvanised panels and posts bolted together with corner gussets. Panels are secured using mono steel rivets.

The base and shelving panels Jaloc are reinforced folded sheet metal held together using mono steel rivets for greater strength and reliability.

Door hardware is a robust surface mounted pull handle and hooked-latch lock with a key cylinder. Custom lock options are available, such as multipoint and padlock tabs.

Doors slide in folded sheet metal channels on hardened nylon wheels secured with stainless axles.

The locker uses 8 galvanised screw in M10 adjustable feet located around the locker base. The outer feet include bolt down provisions for seismic restraint.

A perforated top panel is available if the locker is situated under a buildings sprinkler system.
