

## Upright Storage Locker

Model Number, JURL1400OD

### Product Summary

This New Zealand made Jaloc Upright - Folded sheet metal locker is architecturally suited for medium-high density housing patio, carport or carpark area.

The custom designed Jaloc Upright Storage Locker is a sliding door sheet metal storage cabinet with a single side shelf which can be positioned at different heights on the left hand side of the locker.

The cabinet is made from folded electro galvanised panels riveted together using mono steel rivets. Stainless steel panels are an option for greater durability in exposed environments.

The locker is designed for outdoor use by overlapping panel construction to prevent water ingress, using butyl-rubber seals and condensation drainage holes.

The door slides on hardened nylon wheels secured with a stainless axle.

The Upright Locker uses a robust economical flush mounted pull handle and a compression latch key operated barrel lock system.

The locker height and level can be adjusted using screw in M10 adjustable feet to approximately 50mm. Typical installation is to bolt to concrete pad with M10 x 50 Dynabolts.
