

Patio Storage Locker

Model Number, JODL1H

Product Summary

This New Zealand made Jaloc Outdoor - Folded sheet metal locker is architecturally suited for patio, deck and carport areas.

The custom designed Jaloc Outdoor Upright Storage Locker is a hinged door sheet metal storage cabinet.

The body and door is made from folded electro galvanised steel panels riveted together using mono stainless steel rivets.

The locker is designed for outdoor use by a considered construction that prevents water ingress. Panels and butyl seals overlap together with a cap style pitched top, at approximately 2 degrees. A drip edge helps to prevent water from entering the doorway. Vented louvres prevent internal condensation.

The locker can be constructed from stainless steel sheet for corrosive or coastal environments.

The doors hinge on stainless steel butt hinges, jamb mounted for security.

The outdoor locker uses a robust flush mounted rotating handle and a compression latch key operated barrel lock system, with a 3 point locking mechanism. Clasp style lock latches, for padlock use, are optional.

The locker height can be levelled up to 50mm using screw in M10 adjustable feet. Locker can be secured to the ground via bolt holes in the footplate.
